PROFESSIONAL SUMMARY

Detail-oriented BCA student with skills in Python, SQL, Pandas, NumPy, Matplotlib, Excel, and Power BI. Strong analytical and problem-solving abilities with an interest in data analysis and visualization.

EDUCATION

Bachelor of Computer Applications (BCA)	2023-2026
Institute of Management Studies (IMS), Noida	
Percentage: 79%	
CBSE Class XII	2022
Percentage: 84%	
CBSE Class X	2020
Percentage: 91%	

TECHNICAL SKILLS

Programming Languages: Python, SQL
Python Libraries: Pandas, NumPy, Matplotlib
Data Analysis: Data Cleaning, Data Manipulation, Exploratory Data Analysis (EDA), Data Visualization
Data Visualization Tools: Power BI, Tableau
Tools: Microsoft Excel, Google Sheets, Jupyter Notebook, Visual Studio Code

PROJECTS

Retail Sales Analysis

Tech Stack: SQL

- Designed and queried a retail sales database to analyze sales performance.
- Performed data cleaning and exploratory data analysis (EDA) using SQL.
- Answered business-related questions using joins, aggregate functions, and SQL queries.

Flight Delays Analysis

Tech Stack: Python, Pandas, Matplotlib

- Cleaned and transformed flight data using Pandas.
- Analysed flight delay patterns by day of the week.
- Generated insights from the processed dataset.

Coffee Survey Analysis

Tech Stack: Python, Pandas, Matplotlib

- Cleaned and prepared survey data using Pandas.
- Performed exploratory data analysis to identify preferred dairy alternatives.
- Summarized findings to support business recommendations.

A Century of Top Songs Analysis

Tech Stack: Python, Pandas, Matplotlib

- Cleaned and transformed song duration data using Pandas.
- Analysed trends in top songs across different decades.
- Explored historical patterns through data analysis.

Ocean's Deep-Diving Animals Analysis

Tech Stack: Python, Pandas, Matplotlib

- Created customized visualizations to compare diving depths of marine animals.
- Enhanced chart readability using advanced Matplotlib formatting techniques.
- Presented data through effective visual storytelling.

Granola Health Analysis

Tech Stack: Python, Pandas, Matplotlib

- Cleaned and merged nutrition datasets using Pandas.
- Compared public and expert opinions on healthy foods.
- Developed scatter plot visualizations to highlight key differences.
